Cyrimine hydrochloride is a synthetic compound  
chemically related to trihexyphenidyl which has been  
used for several months in 34 patients with Parkinson's  
disease. It has a good symptomatic action and is well  
tolerated. This study indicates that cyrimine should

v. 67, no. 34, p. 1386-[1388].

DESCRIPTORS: \*Corticosteroids, Drugs, \*Therapy,  
\*Asthma.

The early secondary reactions have been studied. These occurred as often in the patients treated with methylprednisolone as in those under prednisone treatment. In contrast, dexamethasone was more irritating to the gastric mucosa. The cases of water retention were more numerous with the fluorine derivatives than with methylprednisolone. (Author)

DESCRIPTORS: Drugs, \*Sulfonamides, \*Pancreas,  
Cells (Biology), Insulin, \*Diabetes.

The present article is devoted to an analysis of the remarkable tropism that the hypoglycemic sulfonamides possess for the beta cells of the islets of Langerhans of the pancreas ( $\beta$ -cytotropism), to the trophic action that these substances exert on the  $\beta$ -cell apparatus ( $\beta$ -cytrophism) and to the potentiating effect that the hypoglycemic sulfonamides exert on the action (Biological Sciences--Pharmacology, TT, v. 8, no. 8)
